

Dräger X-plore® 3350/3550 Half Masks

Leveraging from over 100 years of history and experience in the respiratory protection field, Dräger has developed the X-plore® 3350/3550 half masks specifically for Asian customers. This half mask range is designed to provide a close fit and a secure seal for Asian faces, combining a soft mask body with a lightweight compact structure to achieve first-rate wearing comfort.

The Dräger X-plore 3x50 half mask is an ergonomic new product that has been designed to fit Asian face shapes. The X-plore 3x50 meets the unique high comfort and low cost requirements of Asian customers, and is also LA-certified. With a perfect combination of comfort and superior protection, it sets a new benchmark for half masks.

In addition to the mask body's soft sealing rim, which is modelled on Asian face types, the hard part of the mask incorporates a patented hinge design. This enables the main section to be opened or closed to fit the wearer's face, thereby achieving optimum fit and comfort. The innovative X-guided strap system distributes weight evenly and the "swept-back" design allows for a perfect fit under welding shields and visors. The large-diameter filter connections lower resistance for easier breathing. The gasket is integrated into the filter connector to prevent loss and increase safety.

Choose from either the low-maintenance, economical Dräger X-plore 3350 version or the extremely comfortable and robust Dräger X-plore 3550 version for long-term, demanding tasks.

Major features of the X-plore 3550 include the "FlexiFit" head cradle, made from new smooth material that ensures an excellent fit to your head without hair entanglement, and which is almost unnoticed under a safety helmet. The "Drop Down" strap design allows you to take off the mask without removing a safety helmet: by simply opening the neck clips, the respirator slides down from your face and sits close to your body, protected from dirt and grime.

Dräger X-plore half masks are available in three sizes, ensuring a great fit for different face types. Equipped with a safe and easy-to-use bayonet connection system, they are compatible with the full line of Dräger X-plore Twinfilter products.

Wherever respiratory protection is needed, e.g. at chemical and steel plants, in the automobile and shipbuilding industries, maintenance, utilities supply and disposal, the Dräger X-plore 3x50 half masks can provide you with a perfect solution.
